Freemotion.Logic V25

More safety and comfort.

The Freemotion.Logic software is your total solution for revenue control and access management in your ski resort. Whether online or offline, its secure data processing allows for precise pool allocation as well as targeted marketing opportunities. And even more: Freemotion.Logic makes it easy to integrate third party systems.

The complete solution

The multifunctional system is the basis for a variety of different tasks: ticket sales, access monitoring, reporting, data exchange, fraud protection, as well as system configuration, administration and management, and much more.

Online and offline data management

A seamless data processing is ensured in both online and offline mode. Take advantage of the valuable business data, such as for targeted marketing activities. But not only this: the precise recording of data allows for accurate allocation within the pool.

Perfect customer experience

Easily integrate third-party systems – for example, web shops & loyalty solutions, CRM systems, or vertical meter calculators - that let you offer your customers a whole new experience: buying ski tickets online, going directly to the slopes, collecting bonus points, and receiving valuable information about the ski day.

Highest standards of security

Ticket scammers have no chance. Secure tickets, photo comparison, and a comprehensive data record make card fraud and counterfeiting almost impossible and therefore protect your revenue.

SKIDATA®
KUDELSKI GROUP

Features

- Multi-functional sales channels – from touch operated POS workstations and ticket POS terminals for external sales outlets (e. g. at hotels) to terminals for issuing reserved (pre-ordered) tickets, to recharging and return machines and Internet-based sales channels; Freemotion.Logic is designed to cover a wide range of applications.
- Administration and configuration – Central article management; definition of prices, pricing conditions and discounts; definition of system currencies; configuration of access points and access conditions; definition of seasons, time sections and operator pools; ticket layout design; customer master data administration, and much more
- Control Center – Easy monitoring and local or centralized control of access devices, providing full round-the-clock overview and control of all access points
- Reporting and statistics – Financial reports, operational management reports or account settlement between operator pools. Always keeping up to date on essential statistics and facts is easy, thanks to the SDRDM report management tool and the ability to create ad-hoc reports at any time within individual applications.
- Interfaces – From electronic payment to ticket data management, extended ticket checking, integration into ERP systems, loyalty and customer bonus programs, and many more, Freemotion.Logic offers a wide range of interfaces to suit your needs.
- Security – Freemotion.Logic provides secure data management to ensure optimum protection against ticket fraud. The system-wide photo comparison solution and height sensor help you to effectively reduce ticket fraud. And in the event of your system going off-line, that is no problem either, as Freemotion.Logic will continue to work reliably even when it is not on-line.
- Certification – SKIDATA applications "Super Data Central" and "Direct to Access" are certified as per ISAE 3402 (International Standards for Assurance Engagements).

Standard Version

- POS System
  (Touch.Cash 'Freemotion' or Manual.Cash 'Freemotion')
- Module for monitoring and control of access readers
  (Freemotion.Logic 'Operation Center')
- Ticket tracking – complete ticket history at a glance
- On-line / off-line functionality
- Freemotion.Logic Data Central
- Editor for administration and configuration of Freemotion.Logic
- 'Journal Viewer' for viewing POS system journals
- Data transfer application 'Perstrans'

Options

- Tablet, smartphone application for remote control of access gate readers
  (Freemotion.Logic 'Control Monitor')
- Mobile ticket checking
  (Handheld.Gate 'Keymobile')
- Mobile device for monitoring and control of access gate readers
  (Handheld.Gate 'Monitor')
- Photo compare application
  (Photo compare)
- Ski and Parking compatibility – for combined ski resort and parking management
- Data Central master station
  (Super Data Central – SDAZ)
- POS solution for issuing pre-ordered tickets
  (Manual.Cash 'Pick-up')
- POS solution for issuing tickets with cover letters
  (Manual.Cash 'Print&Send')
- Compact decentralized POS solution, e. g. for hotels
  (OPOS.Cash)
- Interface for sales over the Internet
  (Direct To Access (DTA) Subscription)
- Overhead display of gondola counter
- Overhead photo display
- Extended ticket check via external ticketing systems
- Electronic payment interface
  (EPI)
- Photo capturing at the point of sale
- Support of ticket readers/turnstile gates
- Support of ticket coding devices
- Support of external (peripheral) devices such as mobile scanners, cameras, etc.
- Support of ticket vending machines
- Support of ticket return machines
- Reporting software module
  (SDRDM)
- Summary of management key figures
  (sweb.Cockpit)
- Pool account management
  (Pool Clearing)
- Software platform for customer loyalty promotion
  (Loyalty.Logic)
- Uni-directional data export interface for transferring transaction data
  (Ticket Data.Interface (TDI) Subscription)
- 3rd-party data exchange, e. g., for ski resort associations
  (On-Card Compatibility (OCC) Subscription)
