Handshake.Logic

'Info Display'

The 'Info Display' at the access readers helps you in your daily work. Prevent ticket fraud and use it as an information display.

Prevent Ticket Fraud

- **Photo checks**
  Detect unauthorized ticket sharing. The display shows both the reference photo as well as a current photo taken of the customer at the access.
- **Prevention**
  Prevent ticket fraud by showing the screen to the customers and displaying the photo.

Exceptional Customer Service

- **Personalized salutation**
  Reinforce customer relationships by addressing your customers by name.
- **Well informed**
  Whether with a traffic light system or with plain text signals, the operator has all the information they need, allowing them more time for customer support.

Secured Revenue

- **Advertising space**
  Create advertising space partnerships, sell the space and increase your revenue.
- **Reduced ticket fraud**
  Successful reduction of ticket fraud means higher revenue for you.

Success with Advertising

- **Always in your sights**
  Whether you use a graphic or a company logo, the display ensures your message reaches its audience.
- **Targeted advertising**
  Differentiate between VIPs, children, and adult tickets. Targeted advertising is possible on request.

SKIDATA®
KUDELSKI GROUP

Features

Functions

- You can choose between three layouts for your Info Display:
  - Display of operator information messages only
  - Display of the reference photo next to the current photo, together with the operator info message (requires Handshake.Logic 'Photo Compare Basic' option)
  - Display of the reference photo and operator info message
- The background color can be set to gray or configured to dynamically indicate the current status color, similar to the Vario.Gate light signal (red, yellow or green, depending on the current status being indicated).
- Configuration of 'light signal' status color display under Handshake.Logic:
  - Indication of ticket properties and counter status information (e. g., Children's Ticket, Season Pass, Discounted Ticket, "Visitor quota reached", etc.).
- Display of an individual screen saver image after a custom-definable idle period

Uses and Applications

- Information display for stadia, arenas, amusement parks, museums, etc.
- Ticket misuse prevention
- Detection of illegal ticket transfer
- Enhanced access security
- Display of company logos
- On-screen advertising

Note on data privacy

- The operator is solely responsible for ensuring conformity with applicable legal requirements for the operation of the products. As an operator, please ensure compliance with any legal requirements (specifically with respect to data protection). When in doubt, seek professional legal advice and obtain confirmation of your customers' consent where required.

Standard Version

- Handshake.Logic 'Info Display' license for display control (one license per Info Display)
