

Handshake.Logic 'Pre-Event Check'

Testing to be on the safe side

Less effort for ticket tests

- **Save the walk to the checkpoints:** The simulation program Handshake.Logic 'Pre-Event Check' does the ticket check usually carried out at checkpoints and checks the configuration based on all sold tickets.
- **It works without even printing one single ticket:** No more time consuming printing and cancelling of test tickets – Handshake.Logic 'Pre-Event Check' is the solution.

Saves time and trouble

- **Facilitate your work:** Time consuming and extensive ticket tests are history. Handshake.Logic 'Pre-Event Check' offers efficiency and safety.
- **No fear of bad surprises on the event date:** Test all sold tickets in advance – for you and your visitor's sake.

A problem foreseen is half avoided

- **Understand the problem:** Within one glance the tickets that may cause problems at the entrance can be spotted and the configuration can be adapted as required.
- **Solve the problem:** Test until the result will guarantee a smooth run of the event.

Playing it safe

- **Test your tickets:** Already before the event – until everything is okay.
- **Simulate already today:** Without changing the system time, you can test tickets for upcoming events already today. Thanks to the simulation you are perfectly well prepared for the upcoming event.

Properties

Functions
